PROFESSIONAL SUMMARY

Systems Engineering Graduate with hands-on expertise in **Software Quality Assurance (QA)**, **API testing (Postman)**, and relational database validation with **SQL (PostgreSQL, MySQL)**. Proficient in functional test case creation, smoke/regression testing, and defect life-cycle tracking in **Jira**. Specialized in Data Science & Systems Engineering through the **Oracle Next Education (ONE)** program. Fluent in technical English (B2 / Upper-Intermediate), highly analytical, and equipped for immediate onboarding in **100% remote roles across LATAM, US, and Global teams**.

CORE TECHNICAL SKILLS

QA & Software Testing: Functional Testing, Smoke Testing, Regression Testing, Test Case Design, Bug Lifecycle & Reporting, Test Matrices, Edge Case Analysis, Agile/Scrum.

API & Backend Testing: Postman (Test Suites, Environments, JSON Schema Validation, HTTP Status Code Assertions, Response Time Checks), RESTful APIs.

Databases & SQL: Advanced SQL Queries (JOINs, aggregations, subqueries, schema integrity verification) in PostgreSQL, MySQL, SQLite.

Programming & Scripting: Python (FastAPI, Pandas, basic Pytest, automation scripts), JavaScript, Bash.

Platforms & Systems: Jira / Jira Service Management, Git & GitHub, Linux (Ubuntu), Windows 10/11, Docker basics.

TECHNICAL PROJECTS & HANDS-ON EXPERIENCE

REST API Automated Testing Suite & Backend Management Platform — 2024 - 2025

Software QA & API Testing • Postman, Python (FastAPI), PostgreSQL, Git | github.com/JackMBerrocal

- Architected comprehensive automated test collections in **Postman** covering 15+ RESTful endpoints, validating HTTP status codes (200, 201, 400, 404) and response payloads.
- Authored Postman JavaScript test assertions ensuring strict compliance with JSON schema contracts and response latency thresholds.
- Executed direct database verification via **PostgreSQL** using relational SQL queries to validate transaction atomicity, data integrity, and constraint enforcement.
- Documented test execution results, edge-case failure modes, and bug reproduction workflows.

Enterprise IT Support, Systems Diagnostics & Ticket Management Lab — 2024

Systems Administration & Troubleshooting • Jira Service Management, Linux, Windows Server, TCP/IP

- Simulated full incident and bug lifecycles in **Jira Service Management** (severity categorization, detailed reproduction steps, logs attachment, resolution tracking).
- Diagnosed network connectivity challenges (TCP/IP, DNS, DHCP, VPN) across virtualized environments.
- Authored technical runbooks and troubleshooting standard operating procedures (SOPs) to streamline problem resolution.

EDUCATION & CERTIFICATIONS

Universidad Tecnologica Latinoamericana (UTEL) — B.S. in Systems Engineering — **2025**

Oracle Next Education (ONE) / Alura Latam — Data Science & Systems Engineering Specialization — **2025**

LANGUAGES & WORK AVAILABILITY

English: B2 (Upper-Intermediate) — Fluent technical reading, documentation comprehension, and professional written/spoken communication.

Spanish: Native.

Work Setup: 100% Remote ready (Dual-monitor high-performance workstation, fiber optic high-speed internet, immediate availability).
